## EXPERIENCE

### Career Break – Professional Development, Czechia

JUL 2022 - PRESENT

- Completed an in-depth course on modern JavaScript, covering ES6+, DOM manipulation, asynchronous programming, and building dynamic web applications.
- Gained a solid foundation in HTML5 and CSS3 by building and deploying several practice projects, focused on learning and improving my skills. These projects are available on my GitHub profile: <https://github.com/vmarchel>
- Gained hands-on experience in Python scripting, automation, and key IT tasks, including system administration, networking, and managing cloud services.
- Learned SQL fundamentals, including querying, data manipulation, and database management for real-world applications.

### Deloitte, Romania & Czechia — Consultant in Forensic Services

OCT 2015 - JUN 2022

- **Technical Troubleshooting & Support:** Diagnosed system issues, including Citrix connectivity, and provided direct technical support to users.
- **Data Analysis & Automation:** Analyzed large datasets using Brainspace and Excel to support investigations and process improvements.
- **Process Improvement:** Collaborated with IT departments to enhance workflows using Microsoft Access, IBM i2, and Visio.
- **User Training & Stakeholder Collaboration:** Onboarded and trained users on specialized software (Relativity) and designed KPIs for senior management.
